This cross-sectional view shows a substrate 112 with a thin layer 114 on its top surface. A layer 115 is formed on the top surface of layer 114. A structure 250 is positioned above layer 115, consisting of a central layer 251 and side layers 253a and 253b. The side layers 253a and 253b are positioned on the left and right sides of the central layer 251, respectively. The central layer 251 is positioned on top of layer 115. The side layers 253a and 253b are positioned on top of the substrate 112. A vertical structure 231 is formed on the top surface of the substrate 112, extending upwards from the central layer 251.
